SUMMARY

Computer Science graduate specializing in backend development with Spring Boot and Hibernate. Proven ability to design and implement RESTful APIs, build secure authentication flows, and integrate React/Next.js frontends with scalable databases like PostgreSQL. Delivered multiple full-stack projects from concept to deployment, improving performance, reliability, and maintainability. Driven to apply modern engineering practices such as CI/CD, testing automation, and version control in team-based environments.

EXPERIENCE

Front-End Developer Internship | Techryt | Remote, Lebanon

Aug 2025 – Oct 2025

- Designed and implemented the **core architecture** of a Next.js web platform, improving code scalability and component reusability.
- Developed and deployed **two interactive gaming systems** (Dice and Slot Machines) with optimized probability logic, animation effects, and secure client-side state handling.
- Enhanced front-end performance and user engagement by integrating **Framer Motion** and custom animation libraries for fluid, responsive interactions.

EDUCATION

Rafik Hariri University (RHU) – Mechref, Lebanon

B.S. in Computer Science | GPA: 3.4 / 4

Sep 2022 – Dec 2025

PROJECTS

Smart Presence – Automated Attendance System (Senior Project, Team of 4)

- Led **frontend development** using **React + MUI**, designing interactive dashboards and attendance views.
- Collaborated with teammates integrating **Laravel backend** and **YOLOv8 + LBPH** models for automated face recognition.
- Developed modular, reusable components to enhance UI consistency and scalability for institutional use.

ElectroZone (Electronics e-commerce website)

- Developed a role-based e-commerce system with **React (frontend)** and **Spring Boot (backend)**, featuring JWT-secured authentication and session management.
- Built complete **CRUD functionality** for products, orders, and messaging via **PostgreSQL** and RESTful APIs.
- Enhanced user experience by integrating a **synchronized shopping cart** and order workflow between **React** and **Spring Boot** layers.

Garden Haven – Gardening E-Commerce Website (University Project, Team of 3)

- Took primary responsibility for **frontend**, building responsive layouts with **React.js**, **Firebase authentication**, and **Supabase** integration.
- Implemented product management, order tracking, and real-time filtering features to improve browsing and user flow.
- Created a cohesive visual design system to ensure brand consistency and optimized usability across devices.

Hara Elections – Web-Based Voter Search and Management System (Personal Project)

- Built a fully client-side web application using **HTML**, **CSS**, and **JavaScript** for bilingual (Arabic/English) voter data filtering and vote tracking.
- Integrated Excel data parsing via XLSX.js for dynamic retrieval of registrants by family name, registration number, and gender.
- Implemented **localStorage/sessionStorage** persistence for offline vote recording, search caching, and user session continuity.
- Designed responsive UI with interactive tables, popovers, and modular search views to support community-level election monitoring.

Booklify – Book Store E-Commerce Website (University Project, Team of 3)

- Developed a full-featured **bookstore website** supporting user **registration/login**, **admin dashboard**, and **CRUD operations** for products and orders.
- Built **shopping cart**, **checkout**, and **order management** modules ensuring complete e-commerce functionality.
- Implemented secure authentication, role-based access, and responsive UI for optimal performance across devices.

SKILLS

Programming Languages: Java, JavaScript, C++

Frameworks & Libraries: Spring Boot, Hibernate, React.js, Next.js, Tailwind CSS

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Vercel

Languages: Arabic (Native) | English (Intermediate)
